

## Introduction to RStudio

For those who are new to Rstudio, it would be good to take a few minutes to orient yourself to Rstudio. In addition to this, it would be good to see how to execute R commands in Rstudio. For this, we will make use of the lessons provided by the Software Carpentry Organization. They have made available several short lessons to become comfortable with Rstudio and R here. We are specifically interested in the **Introduction to R and RStudio** lesson.
